

How You Make a Mummy

How you make a Mummy
Is not so very yummy

You take out all the bits
By making little slits

Bandages are wrapped
And around the mummy strapped

Heart and brain removed
Strange powders often used

Prayers are read out loud
Above the mummies shroud

And then there is a box
Called a Sarcophagus.

The mummy's placed inside
A lovely place to hide!

It waits three thousand years
Until you're walking past

And then it climbs right out
With an awful shout

'Boo' it says out loud
Then hides beneath its shroud
